

Simple credit card processing

Installation Instructions

Description

EasyCC provides a quick and easy method for processing credit card purchases

Demo Installation

Mac

- 1) Just double-click on the EasyCC icon from the mounted disk image. The file will be a zip file.
- 2) Extract the EasyCC folder from the Downloads Folder and place in your Applications folder. Open the folder and double click on the EasyCC icon. This will launch the EasyCC application.
- 3) To read the User Guide double click on the "Read Me" file inside the EasyCC Folder.

Windows

- 1) Just double-click on the EasyCC zip.
- 2) Place the extracted folder on the Desktop or Applications Folder. Open the folder and double click on the EasyCC icon.

Real Use Installation

Next Step

Your EasyCC will already be installed if you followed the instructions above. To process real credit card charges you must now activate it for real use. To do so EasyCC requires either a merchant account or a gateway account in order to process charges. Either of these accounts must be established through us at Einstein Software LLC using the links below or by filling out the gateway form.

Rates

As with 95% of our customers we will help you get you **much** better rates than those you had before. [Click here to open a Merchant Account](#) or [Click here to open a Gateway Account](#)

Uninstall

Uninstalling EasyCC is easy. If you are on a Mac, find the EasyCC folder and drag it to the Trash. If you are running Windows, go to the Start menu/ Control Panel/ select AddRemove.

System Requirements

Mac OS X 10.4 or later. Intel or PowerPC Mac. Windows XP.

Pricing

As an introductory offer, EasyCC is currently FREE.
